<SELENA profile>

An alien princess from the cosmos, SELENA has landed on Earth to share her songs with humankind. Fascinated by human music, she's always using her extraordinary voice to give life to songs as stars give light to the dark. Mature and regal in both her appearance and cadence, her curiosity and warmth are very alluring to all who meet her.

Height: 172 cm

Weight: 60 kg

Element: Space

Representative Color: Blue

Favorite Instrument: Piano

Favorite Animal: Cow

Zodiac Sign: Scorpio

Blood Type: A+

<Oktavia profile>

An American singer who is classically trained, and has been an avid fan of vocalo-music and creators over the last decade. Since 2016, she has been actively creating cover songs on her YouTube channel where she has achieved over 100,000 subscribers. Through this passion, she has studied in Japan and learned the Japanese language to deepen her understanding of the media she engages with and to write her very own lyrics.

[About VoiSona]

"VoiSona" is an AI singing software that realistically replicates human singing using cutting-edge AI technology. The name "VoiSona" combines "Voice," meaning sound, and "Persona," meaning personality or charm, reflecting the goal of expressing diverse personalities through voice. The software supports both voice providers and creators, aiming to create a mutually beneficial ecosystem.

Based on years of AI technology developed by Techno-Speech, the software is compatible with both Windows and macOS and supports VSTi/Audio Units, catering to professional needs as well. It comes with a default Japanese voice library called "Chis-A" with a neutral tone. For users without a DAW supporting VSTi/Audio Units, a standalone app is also provided. Audio output created with "VoiSona" and "Chis-A" can be used for both commercial and non-commercial purposes, generally free of charge, except for specific cases.

- ✓ Product name: VoiSona

- ✓ Official website: <https://voisona.com/>
 - ✓ Release date: September 1, 2022
 - ✓ Format: Download
 - ✓ Price: Free for the "VoiSona" main software and the standard Japanese voice library "Chis-A." * Additional voice libraries are available for purchase.
- * Registration on the official website is required.

[System requirements for VoiSona]

- ✓ Supported OS: Windows 11 / Windows 10 (64-bit Japanese or English versions), macOS 10.13 (High Sierra) to 14 (Sonoma)
 - ✓ CPU
 - Windows: Intel/AMD processors (Intel Core i5 (4th Gen) or equivalent AMD processors recommended. Snapdragon and other ARM CPUs are not supported.)
 - macOS: Apple Silicon/Intel processors (Apple Silicon or Intel Core i5 (4th Gen) or better recommended.)
- * If processing performance is low, there may be sound skipping during playback. (There is no issue with file output.)
- ✓ Memory: 4GB or more (8GB or more recommended)
 - ✓ HDD: At least 1GB of free space for installation
 - ✓ Graphics: 1280 x 720 or higher resolution in full color
 - ✓ DAW: A DAW that supports VSTi/Audio Units. * In some cases, VoiSona can synchronize the playback position of the DAW.
- * Internet connection required for use.

[Company overview]

Techno-Speech aims to enrich people's lives by applying the results of voice-related research and development in various fields such as entertainment, education, and healthcare.

- ✓ Development of voice synthesis and singing synthesis platforms for professional use
